INTRODUCTION

A brand is much more than a logo, but a logo is a very important element of branding. It is a tangible visual statement of who we are and what we represent.

Standard Nutrition Company has a long history and a bright future. Our branding features a nod to both – with a refreshed barn-and-silo logo graphic combined with contemporary fonts and design elements.

This document summarizes brand guidelines across and within the businesses of Standard Nutrition Company. The guidelines feature both unifying and distinctive elements consistent with our business philosophy.

STANDARD NUTRITION COMPANY

BRAND STORY

Based in Omaha, Nebraska, Standard Nutrition Company (SNC) is a privately held, agricultural holding company that has been offering quality products and services across multiple markets since it was founded in 1886. As a leader in livestock nutrition and management consulting, we do business nationwide and employ more than 520 talented professionals through our family of companies, which includes Standard Nutrition Services, Standard Dairy Consultants, AC Bluebonnet and Ag Property Solutions.

LOGO USE

The primary Standard Nutrition Company logo lockup appears as a horizontal, three-color treatment. The secondary logo lockup is a vertical, 2-color treatment.

CLEAR SPACE

In order to make the logo stand out, leave clear space around the logo and other elements on the page. This clear space should be completely free of text or other competing graphical elements. A distance X (the height of the roof and silo noted above in the barn icon) must be maintained. Exceptions may be made on small uses with limited space.

MINIMUM SIZE

Do not reproduce the logo at a size smaller than the minimum size shown above. Exceptions may be made on small merchandise that has limited imprint area space.

PRIMARY LOGO

The primary logo should be used in all situations except apparel and where limited space or color considerations prevent its use.

COLOR GUIDE

PRIMARY BRAND COLORS

It is important that Standard Nutrition Company maintains a consistent appearance in visual communications across various media types and materials. Using colors consistently in all communications will strengthen brand recognition and create impact.

Be sure to choose the correct color build or PMS number based on the output of the final piece. Adhere to the PMS colors and color builds shown below. Do not rely on software and/or a Pantone® Color Bridge book to create a conversion. PMS Uncoated colors should be used on items that are printed on uncoated paper, such as corporate

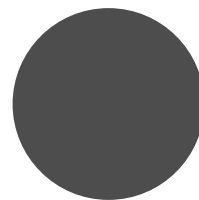

identity system pieces. PMS Coated colors should be used on items printed on coated paper, such as collateral pieces. CMYK color builds should be used on anything printed digitally or on internal communications, while RGB color builds and HTML hex colors should be used for digital applications.
